## Summary

---

As a frontend software developer, I have a proven track record of developing visually appealing and high-performance user interfaces that enhance the user experience. I am proficient in using a wide range of frontend development technologies such as HTML, CSS, and JavaScript, and I have experience working with modern frameworks like React Js and Next js. I have an in-depth understanding of web development principles, including responsive design, cross-browser compatibility, and search engine optimization. I am also knowledgeable in implementing UI design patterns, component-based architecture, and state management techniques.

Working collaboratively with designers, product owners, and backend developers, I am able to translate complex business requirements into effective frontend solutions that meet user needs. I am a strong communicator and an active listener, always seeking to understand the perspectives and priorities of my teammates.

In addition to technical skills, I have a keen eye for detail and a passion for creating intuitive and accessible user experiences. I am well-versed in implementing accessibility best practices, including semantic HTML, ARIA roles, and keyboard navigation.

Finally, I am experienced in using version control systems such as Git and have a strong understanding of Agile development methodologies, including Scrum. I am always seeking to expand my skillset and stay up-to-date with the latest frontend development trends and best practices.

## Experience

---

### **VisionX Technologies | Islamabad**

#### **React.js Developer (Internship) | 9/2021-12/2021**

- Developing and maintaining complex web applications using React.js.
- Collaborating with designers and other developers to implement intuitive and responsive user interfaces.
- Writing clean, efficient, and reusable code that follows industry best practices and design patterns.
- Building reusable React components that can be shared across multiple projects.
- Optimizing website performance by implementing front-end optimizations such as lazy loading and code splitting.
- Conducting code reviews and providing constructive feedback to other developers.
- Participating in Agile development methodologies, including sprint planning, stand-up meetings, and retrospectives.
- Staying up-to-date with the latest React.js and web development trends and best practices.
- Communicating effectively with team members to ensure project goals are met on time.

### **Marketplug | London**

#### **Frontend Software Developer | 02/2022-04/2023 (Remote)**

- Developed and maintained front-end components for complex web applications such as Chat Application using modern web technologies such as HTML, CSS, and JavaScript.
- Used modern frontend frameworks such as React Js to build scalable and maintainable code.
- Collaborated with designers and other developers to ensure that the user interface is intuitive, responsive, and visually appealing.
- Implemented responsive design techniques to ensure that the web application is accessible on a variety of devices, including desktops, tablets, and smartphones.
- Participated in code reviews and providing feedback to other developers to ensure that code quality is consistent across the project.
- Optimized website performance by implementing front-end optimizations such as lazy loading and caching.
- Participated in Agile development methodologies such as Scrum to deliver projects on time.
- Worked with version control systems such as Git to manage source code and collaborate with other developers.

## **XCDM | London**

### **Essential Frontend Developer | 05/2023-Present (Remote)**

- Developing and maintaining front-end components for complex web applications using modern web technologies such as HTML, CSS, Tailwind CSS, and JavaScript.
- Developed Company's Website ([www.nikeltoken.com](http://www.nikeltoken.com)) using Webflow Builder.
- Developed Design Components in Webflow Builder for the website.
- Using modern frontend frameworks such as React Js to build scalable and maintainable code.
- Collaborating with designers and other developers to ensure that the user interface is intuitive, responsive, and visually appealing.
- Writing clean, efficient, and maintainable code that adheres to best practices and design patterns.
- Implementing responsive design techniques to ensure that the web application is accessible on a variety of devices, including desktops, tablets, and smartphones.
- Participating in code reviews and providing feedback to other developers to ensure that code quality is consistent across the project.
- Optimizing website performance by implementing front-end optimizations such as lazy loading and caching.
- Participating in Agile development methodologies such as Scrum to deliver projects on time.
- Working with version control systems such as Git to manage source code and collaborate with other developers.

## **Education**

---

### **University of Lahore | Lahore**

#### **Computer Science | 08/2021**

- Completed coursework in computer programming, data structures and algorithms, operating systems, databases, and computer networks.
- Participated in team projects to develop software solutions that meet business requirements and user needs.
- Applied problem-solving and critical thinking skills to design and implement algorithms and data structures.
- Demonstrated proficiency in multiple programming languages, such as Javascript and C++.
- Achieved a **3.19** cumulative grade point average (CGPA) through diligent study and hard work.
- Contributed to open source software projects or developed personal projects to showcase skills and knowledge in computer science.

## **Skills**

---

React Js, Next Js, Webflow, HTML5, CSS, JavaScript, Git, MySQL, Typescript, Docker, Web Development
